In 1984, Phil Baechler wanted the opportunity to spend time with his then infant son without forsaking his favorite pastime, jogging. He soon began bringing his son along with him in his baby carriage, but he quickly discovered that standard carriages were not made to endure the stress of long distance usage over various surfaces. So, he designed a specialized stroller that was appropriate for running, and Baby Jogger was born.

Since then, in keeping with our heritage, Baby Jogger has never stopped pushing to find more solutions that allow parents to experience life with baby by their side. From strollers that fold into your hand to strollers that adapt to your growing family—we’ve got you covered. We want to go where you’re going, and our strollers are designed to take you there. We pride ourselves in creating durable, high-quality products, built to withstand it all—just push a Baby Jogger stroller and you’ll feel the difference.

Our strollers

Quality

To assure the highest quality, Baby Jogger products are assembled in several steps. Each of these steps are executed by the same individual at the same location. This chain eliminates mistakes and maintains our high quality standards.

Safety

There is nothing as important as your child’s safety. That’s why all of our products are tested thoroughly, and meets the latest safety standards.

Care and warranty

Care

Even a high quality product needs to be taken care of to maintain a long life. A stroller is a product that will need to get parts replaced as they are being worn by frequent usage. Fabrics will be marked by the sun as time goes by. However, if you take care of your stroller, making sure that you wipe and rinse of dirt, placing the stroller in the shadow on sunny days and giving moving parts lubricant. It will last longer. The fabric can be washed without softner at 30°C. After washing the fabric, mount it to the frame while still wet to maintain shape.

Baby Jogger’s limited warranty:

Under normal use and in compliance with warning labels and operation instructions, the frame of all Baby Jogger strollers are warranted to be free from manufacturing defects for the lifetime of the product. 1 year warranty on fabrics and all other parts of the stroller.

The warranty do not include:

- The warranty issue is caused by misuse or poor maintenance. Please refer to the instruction booklet for guidance on stroller use and maintenance.
- Damage to your stroller is caused by improper installation of Baby Jogger parts and/or accessories. Please refer to the instruction booklet for guidance on stroller assembly and use. When replacing parts, Baby Jogger original spareparts must be used.
- Damage caused to your stroller by corrosion, mold, rust, sun intensity, sweat, detergents, sunscreens, damp storage or frequent washing.
- Damage to your stroller due to general wear and tear, which is the result of everyday use or negligence.
- Repairs or modifications are carried out by a third party.
- Stroller is purchased from an unauthorized retailer.
- Stroller is purchased used or second-hand.
- Stroller is damaged as a result of an accident, airline or freight damage.

Please note that while the warranty may not be honored, replacement parts can be purchased to repair your stroller.
